## Register now for this cybersecurity workshop!

# Cybersecurity for Federal Government Contractors

### Presenters: Enercon Services, Inc. cybersecurity and compliance experts

Effective January 1, 2018, federal government contractors (and subcontractors) are required to be compliant with new cybersecurity regulations, per the Federal Acquisition Regulations (FAR). Contractors to the Department of Defense (DoD) must comply with even *more* regulations, in addition to those required by all federal agencies.

This workshop is designed to help you and your business understand the new requirements, develop secure systems and security controls, and avoid negative consequences.

Topics include:

- Understanding the NIST 800-171 regulations & requirements
- The additional regulations applying to DoD contractors
- Strategies to implement and maintain compliance on a budget
- Review of acceptable policies & systems
- Resources to assist your business with implementation

## Register Now for an Upcoming Class

## Nov. 17, 2017
## 9:30 - 11:30 am
